Work provided by (2) men 8/19, 8/26 and (1) man 8/27/2015 to troubleshoot gear, test and research for replacement relays after voltage surges that damaged all of the timing relays and a couple of the control relays. This quote does not include any work on the breakers. The Normal breaker had a very unusual sound, which has to be looked into, when it charged on 8/27 after it was closed manually. It is likely that the voltage surge/s created an issue issue/s in the breaker/s Because of the present condition of the transfer scheme no further work could be performed on 8/26----- \$4960.00
